3. VEHICLE CLASSIFICATION

3.1 VEHICLE DEFINITIONS

Type A : Standard Production Vehicles:

Vehicles to standard specification as delivered by a recognised production manufacturer. Factory approved modifications and period accessories are acceptable.

Type B: Modified Production Vehicles:

Vehicles which have been modified from standard production specification, for a special purpose, to represent a specific period and facet of motoring history. Refer to the VCC Code for Period Specials

Type C: Reproduction:

A new vehicle, built out of period, with or without period parts, imitating a specific design of a period. Also, Authentic Reproduction Vehicles (ARV) where all components are of new manufacture. Refer to the VCC Code for Period Specials

Type D: Non Eligible Vehicles (NEV):

Vehicles constructed or modified outside the limits of the VCC vehicle categories section 3.3 A to I. as listed below.

3.2 VEHICLE PRESERVATION GROUPS

Group 1: Original with little use:

Vehicles as originally produced with little deterioration. Only items of replacement would be wearing parts e.g. Tyres, spark plugs, battery. As a guideline, recorded mileage would be under 20.000 miles (32.000kms)

Group 2: Original:

a) For vehicles 'TYPE A' above: This preservation group is for un restored vehicles which are still in as produced condition with normal age related deterioration. Wearing parts may be replaced. b) For vehicles 'TYPE B' above: Use this preservation group for unrestored vehicles which have non standard mechanical modifications.

Group 3: Restored:

a) For vehicles 'TYPE A' above: This preservation group is for vehicles which have been restored as near as possible to original factory specification. b) For vehicles 'TYPE B' above. Use this preservation group for restored vehicles which have non standard mechanical modifications.

Group 4: Built up from parts:

Parts from one or more vehicles of the same model, assembled into a vehicle as close as possible to a production model. For 'Vehicle Definitions as above in 3.1'. Use 'TYPE A' where no mechanical changes were required. Use 'TYPE B' where modifications and changes to standard mechanical components have been made. Also if a new body has been built. Use 'TYPE C' where a new chassis has been manufactured and some original period parts have been used in the building of the vehicle.

Group 5: Constructed:

Parts from one or more vehicles assembled into a vehicle representative of one period within the age limits of the VCC. Construction methods and design should be as close as possible to the period that the vehicle purports to represent. Such vehicles must comply with the VCC Code for Period Specials. For 'Vehicle Definitions as above in 3.1' use 'TYPE B' where the chassis is from an original production vehicle. Use 'TYPE C' when a new chassis has been manufactured.

Group 6: Non Eligible Vehicles (NEV):

Vehicles which have come from an original production source which have been modified with modern mechanical components and designs which are outside the age limit groupings of the VCC.
